## Aquamation Services

**Individual\*:** With individual aquamation, each pet is gently placed in their own private chamber within the unit, ensuring a distinct separation. Following aquamation, families will receive their loved one's remains typically within 1-2 weeks after your pet has been brought into our care.

**Communal:** Communal aquamation involves the collective and respectful aquamation of loved ones, where the resulting remains are not separated and individually identified. This process offers an eco-conscious approach while honoring the memory of pets in a shared manner. The remains are not returned to families.

**Private\*:** A private aquamation provides an intimate and exclusive process for a single pet, as your beloved companion is solely placed within the unit. Your loved one's remains will be returned to you typically within 1-2 weeks. The cost of this service is \$580 for pets up to 550lbs.

*\*Individual and private aquamation includes your choice of a bamboo urn or scattering vessel, a resin paw print impression, an ink nose print, your pet's personal identification tag, and a fur clipping.*
